JOHN DEERE COMBINE UPGRADE KITS

Cross Auger Shut Off:

- Cross augers engage after unloading auger has engaged reducing overall system load
- Cross augers disengage prior to unloading auger to allow unloading auger to empty
- Reduces grain weight in the unloading auger
- Improves auger start up and decreases wear and tear

Adjustable Auger Spout:

- Prevents grain dribbling in the field and in transport
- Adjustable from the multi function lever to move spout and easily programmable
- Easier to unload into grain cart or trailer
- Fully integrated into John Deere controls and displays
