

WE'RE PRO

SOLUTIONS

LandPro now has 2 Drones to Ensure Timely Flights

What Drone does LandPro Equipment Use?

DJI Inspire 1 with Sentera NDVI Single Sensor

DJI Inspire 2 with Sentera Double 4K Sensor

What is the Cost?

\$1 per acre of flight

LandPro helps tie it all together for one small price of \$1 per acre using FieldAgent Software and John Deere Operations Center.

What do you receive with your purchase?

Immediate insights into your fields health through RGB, NIR, and NDVI crop health maps and in-field analysis through zone analysis, population analysis, and weed mapping. Combine Sentera-generated data with other crop information to develop variable-rate prescriptions, elevation maps, and run analytics.

What are Common Uses of Aerial Imagery?

- Assessing Water Management Performance
- Quantifying Soil Compaction and Machinery Induced Yield limiters
- Locating late season weed outbreaks
- Variable rate fertility recommendations
- Generally evaluating the consistency of crop vigor across a field
