JOHN DEERE PLANTER UPGRADE KITS

ExactEmerge:

- Maintain accurate seed placement at speeds up to up to 10 mph
- Industry exclusive Brush Belt™ uniformly carries seed from the meter to the trench, reducing seed roll in the furrow
- 20% improvement in population accuracy with curve compensation*

—OR—

MaxEmerge 5e:

- Lowest entry cost for electric drive planter upgrades
- 20% improvement in population accuracy with curve compensation
- Unlocks additional optional features like Easy Adjust row cleaners, Individual Row Hydraulic Downforce, and pneumatic closing wheels
- Fewer mechanical parts compared to ExactEmerge

ADDITIONAL OPTIONS:

Downforce:

- Increase even plant emergence due to increased contact of the row unit to the ground
- Consistently place seed at desired depth regardless of soil conditions

ExactRate:

- Average of 4.3% (up to 12%) reduction in input (fertilizer) costs
- Performance up to 16.1 km/h (10 mph)
- Variable rate prescriptions
- Row-by-row section control
- Flow detection
- In-furrow or 2x2 application methods available

Ask us about compatibility, easy adjust row cleaners, closing wheels and LED light kits!
