Don't Risk It.

Off-brand hydraulic fluids are not **Hy-Gard**. Hy-Gard is formulated by John Deere engineers to perform well beyond even our own JDM J20 standards. Features like friction modifiers and viscosity improvers ensure premium performance and gear-wear protection in all off-road working conditions. *Don't Risk It with anything less.*

Maintenance
Made Easy.

Filter Paks

Regular maintenance - air and fuel filter replacement, engine oil and filter changes - keep your machine running at peak performance. It also helps to prolong the life of critical drivetrain components and engine parts. That's why we've made it easier than ever to get most of the routine maintenance parts you need, all in one box. John Deere Filter Paks. Most kits contain an oil filter, air filter, fuel filter and hydraulic filter specifically engineered for your exact machine. And don't forget the oil! We recommend John Deere Plus-50™ II for premium, all-season performance.

Routine maintenance just got easier. See your John Deere dealer today and ask about a Filter Pak for your machine.

JOHN DEERE

John Deere doesn't just stop at parts... we've got you covered!

Whether you're out in the field, hard at work in the shop, or hanging out in the house, you can count on the John Deere team to keep you stocked, locked, and ready, all year long.

From our friendly dealerships to our comprehensive catalogs, you'll find a complete lineup of quality gear. We carry everything you need from maintenance products to equipment attachments, clothing, tools, toys, and more.

So if you're preparing for next season or just looking for a unique gift idea, remember the John Deere team. We're here to help you get the job done right.

WHAT ARE WORN PLANTER PARTS COSTING YOU?

Have you ever calculated your seed investment for a 10-hour day of planting?

Let's look at a hypothetical example: A corn grower with a seeding rate of 34,000 plants per acre on 30-inch rows with a 24R30 1775NT is planting nearly 1.3 million seeds per hour at 5.5 mph or 2.3 million seeds per hour at 10 mph.

Assuming a bag of seed costs \$274...

$$\begin{array}{l} \text{\$274} \\ \text{bag of seed} \\ \text{(approximately \$.0034 per seed)} \end{array} = \begin{array}{l} \text{\$3,033/hr planting} \\ \text{@ 5.5 mph} \\ \text{\$5,518/hr planting} \\ \text{@ 10 mph} \end{array}$$

Both figures calculated at an average field efficiency of 70%.

Either way ... in a 10-hour day of planting, that's a BIG investment.

With that many dollars in seed going through your planter meters each hour of the day, isn't it worth the cost of a meter inspection to ensure you get the most out of that investment?

**Don't let worn parts wear on your bottom line.
Schedule your John Deere Certified Meter Inspection today!**

JOHN DEERE

LIKE YOUR CURRENT PLANTER?

Add like-new performance to maximize yield potential with retrofit solutions.

ExactEmerge™

Plant accurately at your speed ... even if that's 10 mph (16 km/h).

MaxEmerge™ 5e

Improve population accuracy row-by-row and even on curves.

Pneumatic Closing Wheels

Dial in seed-to-soil contact within seconds from the cab.

JohnDeere.com/UpgradeMyPlanter

Easy Adjust Row Cleaners

Adjust to varying field conditions on-the-go for a clean seed trench.

Individual Row Hydraulic Downforce

Get a consistent seed trench depth row-by-row with the ability to regulate 5 times per second and to adjust 100 lbs. per second.

JOHN DEERE

JohnDeere.com/UpgradeMyPlanter

Gauge Wheel Assemblies, Gauge Wheel Arms and Bushings

The Select Series features a gauge wheel assembly and a Reduced Inner Profile (RIP) tire. The gauge wheel provides excellent depth control in most soil conditions. It works with the Tru-Vee™ opener blades to form a well-defined seed furrow. It firms soil on seed-trench edges and provides flotation for seedbed openers in loose soils. (The RIP* tire reduces sidewall compaction in heavy, wet, no-till conditions.) Select Series gauge wheel assemblies and RIP tires are designed for MaxEmerge™ XP row units only.

The Spoke Gauge Wheel allows mud and debris to flow through the wheel to continue providing superior depth performance. This wheel features serviceable stamped inner and outer rims. The wheel has cast spokes and bearing hubs for added strength. New John Deere Gauge Wheel Arms with self-aligning bushings feature a simple bolt-through design that allows for quick removal for service.

AA67083 RIP gauge-wheel assembly includes gauge wheel and gauge-wheel tire.
 *RIP tires are not recommended for light sandy soils or conventionally tilled soils.

Talc and 80/20 Talc and Graphite Blend

Talc is specially designed for today's wide range of seed treatments to enhance seed flow in all weather conditions. Talc is highly recommended for use with vacuum seed meters; however, some meters require 80/20 talc and graphite blend. This high-grade product offers the benefit of seed coating (talc) and lubrication (graphite) for vacuum seed meters. The 80/20 talc and graphite blend is 97% pure and mined in the USA.

NUMBER	DESCRIPTION	SIZE	LIST	NOW
A113710	80/20 Talc Graphite Blend	2.5 gal./8 lb.	\$23.67	\$21.30
A113711	80/20 Talc Graphite Blend	5 gal./20 lb.	\$45.00	\$40.50

TY25255	Powdered Graphite	5 lb.	\$18.60	\$16.70

Bayer Fluency Agent Advanced

Fluency Agent is a unique polyethylene wax-based seed lubricant for corn and soybeans. It is an alternative for talc and talc/graphite-blended planter seed lubricants and can be used in all makes and types of vacuum planters that recommend the use of a seed lubricant. Testing has confirmed Fluency Agent performs equal to or better than comparable talc seed lubricants while reducing the amount of dust in vacuum system exhaust.

Finger-Pickup Seed Meters

Save time and money by checking meters before you go to the field. For smoother operation, the finger-pickup assembly should be dimensionally correct and fit flush against the carrier plate. Proper finger-spring tension is another essential for good meter performance. Replace stretched or broken springs as needed; also, check for wear on seed belts and replace as needed to ensure peak performance.

1 Coulter/Row Cleaner Combination

Ideal for those times when opener disks need help penetrating tough soil and residue—plus, for tilling the seedbed to help the closing wheels create good seed-to-soil contact.

2 Active Pneumatic Downforce

Automatically maintain precise soil penetration and consistent planting depth without sidewall soil compaction.

3 Fertilizer Openers

Single- and double-disk, frame-mounted fertilizer openers work well for a wide range of tillage conditions, including conventional, reduced, moderate no-till, and more.

4 RowCommand™

Automatically shut individual row units on and off to limit seed overlap and waste—particularly on headlands, waterways, and point rows.

5 Cast-Iron Closing Wheel

These closing wheels are best for tough soil and heavy residue conditions when more pressure is needed to close the furrow. Angle and stagger adjustments are identical to standard rubber wheels.

*Force is a registered trade-mark of Syngenta®

Meters, Rollers, and Tuning Rings for John Deere Air Seeders

Use the low meter roller for seeds such as flax, canola, and alfalfa. The medium roller is best when planting wheat, barley, canola, and small soybeans up to 1/4 inch in diameter and with medium rates of fertilizer. The high rate roller is for high rates of fertilizer and large soybeans bigger than 1/4 inch in diameter. The very high rate roller is best used when planting barley and oats with beards, large seeds such as garbanzo beans, and with very high fertilizer rates. Fine tuning rings reduce the amount of product available to meter for increased accuracy.

NUMBER	METER TYPE	APPLICATION RATE	LIST	NOW
Meter Roller Kits:				
AA45605	Low	1–20 lb. per acre	\$62.89	\$56.60

ProSeries™ Opener Retrofit Kits for 90 Series Openers

The ProSeries Opener offers agronomic advantages and extended wear life compared to the current 90 Series openers.

Features include:

Seed boot – A narrower, tighter fit to the disk results in less soil throw for better seed-to-soil contact and extended wear life.

Press wheel – Narrower and more flexible press wheel improves overall seed-to-soil contact for more even emergence, plus upgraded double-row ball bearing extends service life.

Serrated closing wheel – Improved closing system when seeding in harder, drier conditions. The notches on the wheel break up the drier soil for better germination.

Seed tab – Improved material for longer wear life, angled and more flexibility in the seed trench results in less seed bounce for more consistent seed placement.

Closing spring – Easier adjustments.

1870 Air Hoe Drill Fertilizer Points

Whether using dry, liquid, or anhydrous ammonia, the John Deere 1870 opener has the options that fit the application needs. Austempered 10B38 boron steel point with hardfaced areas and induction fused carbide inserts to prevent wear. Carbide plates are 4mm thick along the point edge and 6mm thick on the tip.

Land the right drop on the right spot with the ExactApply™ retrofit kit

Make every drop count with the ExactApply Nozzle Control System from John Deere. Available as a retrofit for R4030, R4038, and R4045 models, ExactApply features individual nozzle control for precise droplet sizing systems and consistent application management.

Providing you with three times the pulsing frequency of competitive systems—and an industry-exclusive AutoSelect A/B nozzle design—ExactApply maintains your target rate and pressure over a wider range of speeds along with decreasing overlap, reducing input costs and elevating productivity.

Put an end to over-application, crop burn, and off-target drift with ExactApply.

RECEIVE
\$2,500 OFF*
ExactApply Retrofit Kit
(R4030, R4038, and R4045 models)

*\$2500 off the purchase of John Deere ExactApply Retrofit Kits (including boom, alternator, chassis harness, and software) made between November 1, 2018, through April 30, 2019. Valid only at your local, participating John Deere dealer. To be eligible for the \$2500 retail discount, a valid original sales invoice dated between November 1, 2018, through April 30, 2019, must be presented and ExactApply must be installed by the John Deere dealer. Dealer participation may vary. Other restrictions may apply. See your John Deere dealer for details. Offer may be discontinued or modified without notice at any time. Offer cannot be combined with any other offer.
Note to Dealer: See parts bulletin # 061726 for promotion details and redemption information.

Every Drop Counts

New Quick Change Nozzles with ExactApply™ Compatibility

10% OFF*

Low-drift Max (LDM)

This nozzle is ideal for post-emergence systemic applications.

- 120° wide and 60° thick pattern provides optimum coverage while maintaining overlap at low boom heights
- ExactApply 15Hz PWM, 30Hz PWM, and AutoSelect A/B compatible
- Dual pre-orifice nozzle delivering Coarse, Very Coarse, and Extremely Coarse droplets to reduce drift

NUMBER	DESCRIPTION	LIST	NOW
PSLDMQ2006	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69
PSLDMQ2008	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69
PSLDMQ2010	Low-drift Max Quick Change Nozzle	\$10.83	\$9.69

Low-drift Twin (LDT)

This nozzle is ideal for plant health and contact herbicides.

- Twin 30° forward- and rear-facing dual angles for superior coverage
- ExactApply 15Hz and 30Hz PWM compatible
- Medium and Coarse droplets across wide operating range and sizes to meet speed/rate needs

NUMBER	DESCRIPTION	LIST	NOW
PSLDTQ1003	Low-drift Twin Quick Change Nozzle	\$9.74	\$8.79

Ultra Low-drift™ Max (ULDM)

This nozzle is ideal for post emergence systemic herbicide applications where drift reduction is paramount.

- 130° spray angle allows boom heights to reduce drift and prevent pattern collapse when using drift reduction adjuvants
- ExactApply AutoSelect A/B compatible
- Extremely Coarse and Ultra Coarse droplets for 90–95% drift reduction compared to standard flat fan nozzle

NUMBER	DESCRIPTION	LIST	NOW

JohnDeere.com/SprayerParts

ARE WORN NOZZLES COSTING YOU?

Spray nozzles are some of the smallest and most overlooked pieces of equipment on a sprayer, but they have the greatest effect on accuracy, efficiency, and drift potential. Worn spray nozzles can increase application rates and/or change distribution patterns, causing under- and over-application and impacting your bottom line.

WORN NOZZLE SPRAY PATTERN

UNDER-APPLICATION

- Reduced yield
- Inadequate weed, pest, or disease control
- Repeated trips over the field

OVER-APPLICATION

- Increased input costs
- Crop damage

NEW NOZZLE SPRAY PATTERN

3D – All-Purpose Coverage Nozzle

- Delivers up to 10% increase in weed control over conventional flat fans*
- 50–75% less drift compared to flat fan nozzles
- Tight, inclined spray pattern is designed to be installed alternating forward and backward to provide 3-dimensional coverage on hard-to-hit targets
- High-velocity droplets provide excellent canopy penetrations
- ExactApply 30Hz PWM and AutoSelect A/B compatible

Express Boom Assembly

John Deere's Express Boom Assembly provides an economical solution to upgrade your sprayer to support today's complex applications and maximize sprayer performance.

Benefits:

- Convert 20" nozzle spacing to 15" or 15" to 20"
- Upgrade from polypropylene to stainless steel
- Eliminate warping, promoting even spray patterns
- Minimize cross-contamination
- Simplify cleanout
- Available for John Deere sprayers models 4630, 4700, 4710, 4720, 4730, 4830, 4920, 4930, and R4023

Express Nozzle Body End Caps

Improve system hygiene by removing the dead zone on the end of the boom pipes, reducing air and residue buildup.

- Allows air to escape through the nozzle body, reducing turn-off/turn-on times by up to 85%
- Removable end plug allows easy access for boom cleanout

NUMBER	DESCRIPTION	LIST	NOW

New ForceField Centrifugal Pump

Superior wet-seal protection for today's most demanding spray conditions.

- Wet-seal technology protects the seals by using a barrier fluid to keep them cool and lubricated, even while the pump is running dry
- Actively maintains a positive pressure differential between the chamber barrier fluid and the pumping solution, which prevents chemical bonding of the seal faces, resulting in increased life and maintenance-free operation
- Protects seal against dry run failure
- Minimizes sprayer downtime and improves productivity

Ask us how the Forcefield pump provides worry-free sprayer operation.

Replace every 1,000 hours.

HYDRAULIC
Reservoir Breather Filter
AKK11075 (Filler Cup with Filter)
Replace every 1,000 hours.

HYDRAULIC
Oil Filter
AT318160
Replace every 1,000 hours.

Get the most out of your sprayer with Direct Injection

- Isolates contamination, reduces risks, and allows for faster chemical and crop changeover
- Helps manage buffer zones more easily to meet chemical label requirements
- Reduces cleanout time with no mixing of chemicals in the main tank
- Carry up to 235 gallons and 3 different applicants at once to help cover more acres during tight spray windows
- Available on John Deere sprayer models 4940, R4030, R4038, and R4045

Example: Direct Injection Attachment on R4045 Sprayer

Protect your crops and equipment

Get superior cleaning power with leading Spray System Cleaners

A lot has changed in the past decade. Bigger sprayers, more powerful crop protection products, and increased tank mixing can lead to cross contamination and reduced yields when sprayers aren't cleaned properly.

Ordinary tank cleaners were never designed to remove oily residues that can build up throughout the entire liquid system of a sprayer. Erase™ is a powerful spray system cleaner that exceeds the capabilities of ordinary tank cleaners. Erase emulsifies oily residues in tanks, sprayer lines, and hoses while elevating rinsate pH to degrade vulnerable crop protection products. Combined with good sprayer cleaning technique, Erase virtually eliminates the risk of cross-contamination that leads to crop injury complaints, yield loss, and a damaged reputation as a professional applicator.

Erase

Powerful spray system cleaner that penetrates and removes dried-on and oily residue in tanks, sprayer lines, and hoses to help prevent cross-contamination.

NUMBER	DESCRIPTION	SIZE	LIST	NOW
PM433QT	Erase Spray System Cleaner	1 qt.	\$12.29	\$11.30

Renew your disk harrow with genuine OEM parts

Managing crop residue and distribution in any field condition is vital for optimal yield. Inspect your disk harrow today and replace worn components with John Deere genuine OEM parts to ensure optimal performance.

- **Disk Blades** – John Deere Diamond Series disk blades are made of micro-alloy steel and heat treated to maximize wear resistance while ensuring flexibility and impact absorption
- **Scrapers** – high-strength, heat-treated steel for longer life and to help prevent wear on the blade
- **Bearings** – manufactured and tested to stand up to extreme use
- **Spools** – OEM designed to handle constant hammering to the gang and prevent flexing when an obstacle is struck
- **Sleeves** – made of high-carbon seamless tubing for long wear life
- **Gang Bolts** – made of high-carbon, heat-treated steel to prevent bending and boxing

See us today so we can help you keep your disk harrow in top shape!

John Deere Diamond Series Disk Blades

- Made of reliable, long-lasting steel for high-performance disking
- Precision-sharp edges for proper residue cutting and sizing
- Made in the U.S.A.

Dura-Flex Bearings

John Deere Dura-Flex bearings continue to offer superior quality and consistency that is unmatched by aftermarket will-fit bearings. Introduced in 2005, they are used on disk gang assemblies and rolling baskets up to the 2600 series disks.

Dura-Flex Bearing Features:

- Includes 2-year warranty
- Built using a ball ridging, one-piece, molded nylon cage for perfect alignment
- Engineered with a thicker inner bearing race that creates a stronger cross section to withstand tough loads
- Designed with a heavy-duty bearing so the ball is harder than the rings
- Provides total clearance between rings and rolling elements for optimal load distribution and free rotation to allow for thermal expansion
- Prevents premature bearing failure with smooth rolling bearings
- Contains a chamfer in the lubrication hole to ensure proper grease flow
- Increased uptime with a recommended grease interval of 50 hours
- Features seals of a longer length and high-quality material with smooth edges, providing a tight seal to withstand tough conditions

Adjust depth and pressure in six seconds flat with TruSet™

With advanced TruSet Tillage technology—an industry-exclusive from John Deere—you can independently adjust settings for depth and pressure (while on the go) in just six seconds. **That's up to 200 times faster than manual field adjustments.**

With just a few simple touches to a GreenStar™ 3 2630 Display, you can command TruSet to respond to changing field conditions. Go from lighter soil to highly compacted areas with 1/10-in. (2.5mm) accuracy. Also at your fingertips is **real-time data for actual tillage settings**, in addition to tillage pass documentation for later review and analysis.

Available for most newer John Deere implements and tractors—and compatible with competitive tractors—TruSet enhances your entire tillage operation by:

- Maximizing yield potential
- Increasing fuel efficiency
- Lowering operating costs
- Providing documentation and prescription functionality

Compatible equipment for TruSet

- 2230 Field Cultivator
- 2330 Mulch Finisher
- 2510H High-Speed Applicator
- 2620 and 2630 Series Disks
- 2720 Disk Ripper
- 2730 Combination Ripper

Go to <https://www.deere.com/en/tillage/truset/> to learn more.

Come see us to learn more about TruSet.

Exclusive Nutrient Knife has replaceable points for easy customization

Cut down on the time and labor costs associated with replacing nutrient knives. With John Deere's knife series, replacement or removal is as simple as removing a roll pin.

With superior wear protection against demanding conditions, the Nutrient Knives' soil-shattering surfaces and parting fins lift and fracture without actual soil inversion and blowout.

Heavy-Duty Nutrient Applicator Knives

- Provide consistent nutrient placement along with superior compaction shattering
- Cast-chrome, pin-on point provides excellent lifting and fracturing without soil inversion or blowout
- Exclusive 5/8-in. x 23-in. tall size for improved trash flow and greater durability

Conventional Applicator Knives

- Chrome-carbide point for excellent wear
- Available as a standard knife or with vapor tube
- Universal mounting hole for All-Makes applications
- Shank is high-strength steel

John Deere Netwrap and Twine

John Deere Edge to Edge® with TamaTec+

With more footage per roll, now you can make 10–15% more bales with each roll of net—for more baler productivity and less downtime. The new net is lighter and easier to handle, and priced right to reduce your cost per bale. It continues to give the same great bale coverage over the entire width of the bale, protecting the crop as well as helping to maintain the bale's shape, making handling and storage much easier. Now that's delivering the trouble-free baling you have come to know and expect from John Deere Netwrap.

John Deere CoverEdge™ with TamaTec+

John Deere CoverEdge™ goes right over the edge of the bale and snaps into place for better protection. With the elimination of shoulders, bales are perfectly shaped for better handling, transport, and storage. John Deere CoverEdge covers 15% more surface area of the round bale and protects the edges of the bale to help prevent rainwater penetration and moisture collection within the bale. It also improves the weatherability of the package. No loose “fluff” to pick up the moisture from rainfall. With John Deere CoverEdge, you can produce high-quality silage bales when wrapped with stretch film because the bale surface is smooth, eliminating air pockets in the bale.

John Deere XtraTwine Plus™

Large Square Bales

Reduces your cost and increases your baler's potential! Exclusively available through John Deere dealers.

Features include:

- Uniform spool shape and consistent yarn to ensure trouble-free running in the baler
- Guaranteed length
- Unrivaled knotting performance
- Special UV light inhibitors to withstand intense exposure over long periods
- Unique color combination for bale identification
- Compatible with ALL large square balers

Extra spool length

Extra spool length for less spool changes, less waste, and higher efficiency.

Tech Tip:

The best time to lubricate chains is right after machine use when the chains are still warm. The lubricant will cling to the chains and be drawn between the pins and rollers as they cool. Lubricating daily will help prevent crop residue and dirt buildup.

TY26350

Chain and Cable Lubricant

- Penetrates rapidly
- Ideal for all types of exposed chains
- Reduces friction and wear
- Resists rust and corrosion
- Product is free of ozone-depleting chlorofluorocarbons (CFCs)
- Foam action reduces chain throw-off

Precut Baler Chain

*Diamond Chain®:

- Designs each component and has a rigorous quality-control system
- Heat-treated using carburizing furnaces set to precise temperatures
- Uses proprietary shot-peening machinery developed and custom-made to ensure consistent intensity and coverage of components during the shot-peening process
- Uses both a proprietary lubrication formula and hot-dip application process on all lubricated roller chains
- All chain is preloaded to approximate the recommended maximum loading during usage. This firmly seats pins and bushings and helps eliminate any initial elongation

Diamond Tread Baler Belts

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW

DiamondTough™ Baler Belts

Introduced with the John Deere 8 Series balers, DiamondTough baler belts feature:

- 1) Nylon-fill cords that provide superior puncture and tear resistance, along with excellent fastener-holding strength
- 2) Excellent resistance to punctures and tears by inserting heavy-duty polyester straight-wrap cords between the fill cords
- 3) Polyester surface wrap cords that resist abuse and increase flexibility over small baler rollers
- 4) Nylon binder wrap cords that help promote fabric integrity and abuse-resistant properties

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW
AE74209	DiamondTough Short	458, 458S, 459, 459S, 558, 559, and 559S	\$381.18	\$350.70

DiamondTough™ Pro Baler Belts

Our DiamondTough Pro baler belts are some of the most wear- and tear-resistant belts in the industry. The self-cleaning three-step tread design provides built-in wear indicators and includes the following features:

- Built with a special rubber compound that offers excellent resistance to cutting, gouging, and abrasion—the same compound used in tough conveyor belt applications
- Provide greater performance, increased uptime, and reduced cost of operation in tough baling conditions

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW
AFH212598	DiamondTough Pro Short	458, 558, 459, and 559	\$504.30	\$464.00
AFH212599	DiamondTough Pro Long	458, 558, 459, and 559	\$511.40	\$470.50
AFH210848	DiamondTough Pro Short	468, 568, 469, and 569	\$551.66	\$507.50
AFH210849	DiamondTough Pro Long	468, 568, 469, and 569	\$558.94	\$514.20

Tech Tip:

Replacing belt pins before they're worn or broken saves time and reduces wear on your equipment. We recommend checking pins after every 500–1,000 bales.

Windrower Cab Attachments

BXE10927 – Accessory Mount Guide Bar

Features and Applications

- Sliding mounting clamps make fore/aft adjustment fast and simple
- Rugged all-steel construction in the mounting bar ensures years of performance
- Fits W235 and W260 windrowers
- Fits model year 2014 and newer combines

BXE10477 shown with optional cell phone mount (BRE10015) and tablet mount (BXE10479)

Price – \$196.90 **Sale Price – \$177.20**

BXE10480 – Slide Kit

Expand the capacity of the **Accessory Mount Guide Bar BXE10477** with the sliding mount bracket kit.

This sliding mount features a lever lock system that allows for quick adjustment anywhere along the horizontal mounting bar.

Price – \$70.40 **Sale Price – \$63.40**

BXE10479 – Tablet Mount Kit

The tablet kit consists of a composite spring-loaded cradle, expandable grip arms, and additional bottom support keeper. Included are easy-access grip levers, located on the back of the cradle for quick release of your tablet.

Price – \$124.30 **Sale Price – \$111.90**

BRE10015 – Cell Phone Mount Kit

The Ram® X-Grip™ has a clever four-leg design that features great holding power without hiding your phone behind foam pads or plastic.

Price – \$67.10 **Sale Price – \$60.40**

KXE10454 – Footrest Kit

Kick back and relax. The Footrest Kit provides a simple support to make longer rides in the field more comfortable and help with leg fatigue.

(FITS THE W235 AND W260)

Price – \$198.91 **Sale Price – \$179.00**

Advanced Hay, Straw, and Silage Tester

This newly advanced Hay, Straw, and Silage Tester is the most efficient probe on the market. The 20" stainless steel probe and tip provides accuracy, versatility, and durability. The SW07305 will measure push force to determine whether it's a high- or low-density bale, then adjusts the moisture result for more precise accuracy.

Features:

- Measures 8–72% moisture content
- Temperature range 32–185°F (0–85°C)
- Automatic Density Compensation
- Choice of hay or straw bales, separate mode for silage
- Memory can store results up to 64 bales with a total of 1,000 savable moisture and temperature readings
- Continuous reading as you probe bale

NUMBER	DESCRIPTION	LIST	NOW
SW007305	Hay/Straw/Silage Tester	\$296.29	\$272.60

Hay Testers

Hay Core Sampler

Developed by farmer for farmers. The Hay Core Sampler ensures fast and contamination-free sampling from hay bales for testing purposes.

Features:

- Sampling depth is 20"
- Sampler can be used with either a 3/8" or 1/2" drill. 1/2" recommended for best results
- The inside diameter of the shaft is 7/8" allowing samples to stay loose for easy bagging with the cleanout rod between samplings
- Includes cleanout rod for pushing hay into provided zip-lock sample bag
- Shaft and connections are made of stainless steel
- Replaceable core sampler tip

Guidance & Machine Control

AutoTrac™ Intergrated Machine Kits and GreenStar™ Ready Kits make it easy for you to be Precision Ag ready when the time arrives. The AutoTrac machine kits include the appropriate machine steering controller when necessary and AutoTrac Ready accessories. Display, receiver, and software to complete the system are sold separately. These field-installed kits are an integrated guidance solution for John Deere Tractors and are compatible with the GreenStar 3 or GreenStar 2 system components. Gain the edge and get the results you want and need with genuine John Deere Precision Ag components.

Take a bigger bite out of earthmoving jobs.

Thicker and longer than standard blades, these John Deere blades help power through the toughest conditions. Three different widths and a variety of configurations are available on both carry-all and ejector scrapers. Plus many segments are reversible for twice the life.

Straight or Standard Configuration:

Our straight blade configuration comes standard on all John Deere scrapers. They sit flush with the ground and are perfect for precision land leveling, haul road maintenance, and loading sandy material.

Tooth Configuration:

Our tooth configuration is a factory option that allows the scraper to break up material as it enters the bowl. Teeth work well in hard and compact soils and help prevent material from slabbing as it cuts.

Drop Center Configuration:

Our drop center configuration is a popular factory option and the best choice for the toughest soil conditions. The compound blade depths help break down sticky clays and maximize loads.

Alternating Drop Center Configuration:

Alternating drop centers are great for intermediate-to-tough materials like dry clay. This configuration works well when material conditions are constantly changing.

Tooth Drop Center Combination Configuration:

The tooth drop center combination works well in a broad array of soils, particularly light-to-intermediate types where material conditions change frequently.

Is your SPFH “good-to-go” for harvest?

Find out with a comprehensive inspection from John Deere.

Get the most from your Self-Propelled Forage Harvester (SPFH) this season with a comprehensive inspection from John Deere. Our certified technicians can save you time and money by prepping your machine for the long haul before ever heading out to the field. So inspect now to minimize downtime in the future.

Call us today to schedule your appointment.

Get ready for the season ahead

An SPFH inspection from a John Deere technician covers the most vital aspects of your machine, including:

- Engine, Cooling, & Fuel Systems
- Steering & Brakes
- Electrical
- Hydraulic Systems
- Operator's Station
- Safety
- Feedroll Housing
- Metal Detector
- Cutterhead
- Kernel Processor
- Spout
- Blower

Make an appointment today.

Cutterhead knives: *Why ours last longer*

The cutterhead plays a critical role in forage harvester performance.

Which is why it's so important to choose knives that fit, perform, and last. John Deere cutterhead knives do all that. And they're manufactured specifically for your John Deere forage harvester.

Highlights:

- A** Sandblasted surface ensures precise clamping forces
- B** Induction-hardened cutting zone provides long-lasting sharpness
- C** Tough body minimizes risk of breakage
- D** Extended knife body supports retraction in case of impact with an object
- E** Trademarks identify the genuine John Deere knife

Helpful Hint

To examine knives mounted on a drum, use a small, handheld mirror to look under the knife surface.

How to identify low-quality knife coatings

At a glance, most knives look very similar. But take a look at the knife coatings on the right—the real difference is on the bottom where the hard-facing is bonded to the knife body.

Hard-working, longer-lasting John Deere cutterhead knives keep you in the field until harvest is done. Talk to us today about your specific cutterhead needs.

John Deere

Knife is 3/4 worn, but coating remains intact.

Competitor #1

Coating is flaking due to bonding failures.

Competitor #2

Premature wear is due to low carbide content.

Save money on parts. Stay in the field longer. Get Dura Line™ protection.

Your SPFH endures a terrific amount of wear and tear each season. Fortunately, John Deere now offers a solution for your most-often-replaced SPFH parts—one that gives them exceptional strength and service life.

Dura Line is a high-tech, factory-coating process that fuses a chrome-carbide layer to base-metal parts at 2,462°F—for unprecedented protection.

Just imagine ... the less time you spend replacing parts, the more time you can spend in the field. And the more profitable your SPFH becomes.

No part lasts forever, but Dura Line is the next best thing. And it's only from John Deere. Talk with your dealer today.

Dura Line is available for these SPFH high-wear parts:

Anti-Debris Roller Curtain

Perfect for reducing buildup on the feedroll frame and kernel processor. Also makes it easier to clean the machine at the end of the day.

NUMBER	APPLICATION	LIST	NOW
BZ100189	7050 and 7080 Series	\$798.60	\$734.70

Kernel Processor Rolls

The John Deere kernel processor is induction-hardened rather than flame-hardened, like many competitors' rolls. What does that mean to you? Hardening is much more consistent, resulting in a longer life and fewer repair costs. The hardening zones of a John Deere roll are shown in the illustration to the right.

Cutting section

Type	Standard	Saw Tooth Standard	Saw Tooth Chrome	Saw Tooth Whole Crop	Triangle Milo

Trash Nets

The trash net covers the auger and attaches to the compressor sheet of the pickup. The small mesh prevents crop buildup all over the machine, including the cutterhead cover. It also does a great job of keeping the most valuable part of the plant—the leaves—in the feed.

 Replace every 500 hours and as indicated by Diagnostic Trouble Code.

Save Time AND Get Accurate Yield Data with the ActiveYield™ Retrofit Kit

Manual calibrations can take up to 90 minutes, but with ActiveYield, it's done with no time or effort away from harvest—and will save you time every day.

Save \$300 on ActiveYield retrofit kits thru 2/28/19*

With ActiveYield, automatic calibrations occur all day long, eliminating time-consuming manual calibrations. ActiveYield senses the weight of the grain in the tank as it fills. The combine uses the weight information to continually calibrate the yield system.

That means you can make real-time decisions without leaving the cab. Plus, it gives you more accurate yield mapping.

NUMBER	DESCRIPTION	LIST	NOW

The Right Part at the Right Price.

We offer a complete portfolio of tractor starters and alternators so you get the part you need – for as long as you own your machine—no matter its color, or your budget. With Genuine John Deere parts, you'll get the same quality components that were designed and tested with your machine at the factory. John Deere Reman parts are completely disassembled and remanufactured—not rebuilt—to meet OEM specifications. We also offer A&I Products for an economical aftermarket solution. That's the value of choice.

Water Pumps

Water pump seals have two mating surfaces that take a lot of abuse and are susceptible to wear and failure when exposed to contaminants. John Deere OE water pumps use hard tungsten carbide on both seal surfaces to provide maximum protection and component life. The seal face is scratch resistant and also has excellent thermal conductivity to dissipate hot spots.

John Deere Reman water pumps are remanufactured to the current John Deere specifications. The Reman pumps are completely disassembled, and bearings and seals are replaced and tested to verify integrity. In addition to the OE and the John Deere Reman offerings, your dealer also carries A&I Products water pumps, which offer a quality aftermarket product at an economical price.

Crankshaft Dampers

Did you know your crankshaft damper has a service life?

When torque is applied, engines generate harmful vibrations. A damper reduces these vibrations, which extends belt life and reduces gear wear. Our engine damper consists of an inertia ring, elastic member, and hub assembly attached to the crankshaft.

John Deere recommends changing the crankshaft damper at 4,000–5,000 hours or 5 years, whichever comes first in some applications. Contact us to see if your crankshaft damper needs replacing today.

Change out engine dampers to avoid a costly repair or a potential broken crankshaft.

John Deere OE Engine Overhaul Kits

Here are some examples that make the John Deere OE engine overhaul kits the “Best” choice. John Deere liners are heat-treated to a precise hardness and depth to increase durability and life. Proper heat-treat hardness provides a hard surface with good wear characteristics. Pre-assembled piston liner kits eliminate the chance for broken or improperly installed piston rings, which can cause power loss, oil consumption, and excessive wear, leading to seized pistons and potentially premature engine failure. Fiber-reinforced piston bowl rings provide more than twice the yield strength of aluminum alloy and increase the operating pressure and temperature range without the risk of cracking. John Deere uses two layers of metal alloy on the ID face of the main bearings to protect them from the constant rotational forces of the crankshaft.

Standard Kit:

- Rod, main, and thrust bearings
- Thrust washers
- Oil pan split gasket
- Factory assembled piston/liner kits
- Liner packings
- Front and rear seals
- Gasket rings
- Snap rings

Expanded Kit:

- Standard kit contents
- Rod bolts and bushings
- Piston pins
- Camshaft bushings

A&I Engine Overhaul Kits

If you’re looking for a quality offering at an economical price, we also offer A&I Engine Overhaul kits for John Deere and competitive machines. A&I works with quality suppliers to ensure that all parts included in an A&I engine kit perform and fit as they were meant to. Our engine kits offer: cam ground pistons, ni-resist inserts, spun cast liners, and cylinder components designed as a package.

Note: In-Frame Kits typically include Pistons, Liners, Rings, Rod Bearings, & Gaskets and Major Kits typically include Pistons, Liners, Rings, Rod Bearings, Rod Bushings, Rod Capscrews, Cam Bearings, Main Bearings, Thrust Bearings/Washers, Crankshaft Seals, and Gaskets.

AC Compressors

When things heat up and you need to replace your AC compressor, make sure you talk to the experts at your John Deere dealer. Many aftermarket offerings are automotive-style compressors and not meant for off-road applications. Compressor offerings from John Deere include original equipment, new compressors, John Deere Reman compressors, and A&I Products. John Deere Reman compressors are remanufactured back to the original John Deere specifications. A&I Products offer AC compressors without the oil so they can be used in either R12 or R134a applications.

Receiver Drier

The receiver/drier is designed to remove moisture from the air-conditioning system. Over time, it will become saturated with moisture. Moisture combines with refrigerants and creates acids that accelerate the corrosion of internal component parts. Therefore, if an air-conditioning system has been in service for any extended period of time and is opened for service, it is wise to replace the receiver/drier.

Parts OnSite

Maximize uptime with the John Deere Parts OnSite program.

No matter how close your John Deere dealership is, your shop is a lot closer. That's why John Deere offers Parts OnSite—so you can stock parts at your place and get back to work sooner. It's simple—we'll work with you to determine the best parts inventory for your operation. Then, you stock the parts at your place so you can spend more time in the field and less time at the parts counter.

See your John Deere dealer today about how you can get started with Parts OnSite. Also don't forget to ask about how you can take advantage of No Payment/No Interest programs available from John Deere Financial.

NUMBER	DESCRIPTION	DIMENSIONS

Par 36 Replacement LEDs

These lamps are a perfect retrofit for any round-housing application. Offered as an alternative to AR104119, RE35168, AR21059, and other standard 114mm (4.5") round sealed beam lights on 20–60 Series row-crop tractors. Light Output: 1390 raw lumens, 1020 effective lumens.

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW
RE561116	LED Lamp, flood pattern	Upgrade for 20–60 Series Tractors	\$110.37	\$99.30
RE561117	LED Lamp, trapezoid pattern	Upgrade for 20–60 Series Tractors	\$110.37	\$99.30

Roof and Hood Lights

Designed to replace roof and hood lights, these LEDs deliver more light with less current draw under the harshest conditions, without fogging over, burning out, or breaking like many halogens. Additionally, these lenses are designed specifically for hood and roof locations. Direct fit replacements for R161288. Light output: 1280 raw lumens, 998 effective lumens.

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW
RE577572	2" x 5" LED Roof Work Lamp	Replaces sealed beam lights in 6100–6400, 7200, 7400–7800, and 8100–8400 Series Tractors	\$106.22	\$95.60
RE577573	2" x 5" LED Hood Work Lamp	Replaces sealed beam headlights in 4040, 4050, 4055, and 4060 Series Tractors	\$106.22	\$95.60

Rugged LED Work Light

Brighter and more durable than ever before! This rugged LED work light is built to withstand the harshest conditions, providing worry-free reliability when you need it. Mounting hardware included, allowing these lights to attach to any machine.

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW
RE574376	Work Lamp, LED, flood pattern – 860 effective lumens	General Purpose LED, Rugged Design, Mount Anywhere	\$95.64	\$86.10

12-LED Light Kit – 8000 and 8010 Tractors

Upgrade your 8000 and 8010 Series John Deere tractor with the 12-LED light kit from A&I Products.

Upgrade light kit includes:

- (2) WL060 – Fender mount replacement for John Deere part # RE330060
- (2) WL061 – Side mount replacement for John Deere part # RE330061
- (4) WL062 – Bottom mount replacement for John Deere part # RE330062
- (4) WL063 – Front flood light replacement for John Deere part # RE342545

Mounting brackets included with each light; each light part number has different bracket kits. For power, use existing tractor harness and plug into lights or use included power harness adapter (1 per light).

Ballasting for Loader Work

When doing loader work, rear ballast provides a counterweight for material in the loader bucket. This maximizes overall stability and productivity by keeping all four wheels on the ground. In addition to improving the tractor's performance, proper rear ballast will maximize the life of the front wheel drive axle, as well as other drivetrain components. A 3-point hitch-mounted implement can also be used for ballast, but it must meet the specified weight requirement. A 23-cm (9-in.) high extension can be added to the cat. 1 ballast box for even greater capacity. A bushing kit is required for the ballast box to be used with the iMatch™ Quick-Hitch.

NUMBER	DESCRIPTION	LIST	NOW
BW15073	Ballast Box for Category 1 Hitch*	\$ 302.50	\$287.40
BW15074	Ballast Box Extension for Category 1 Box	\$ 143.00	\$128.70

LP19969	iMatch Bushing Kit	\$ 32.00	
LP25004	Quick Hitch Adapter Bushing Kit	\$ 29.70	

*Compatible with the iMatch Quick Hitch (Must order necessary bushings kit).

Loader Suspension System

An enhancement to the loader is the suspension system. An accumulator charged with nitrogen and connected to the head-end lift cylinder hose through a T-fitting provides shock absorption. This extends life of loader pins and bushings and puts less stress on tractor axle. Choose a manual on/off lever or an operator station on/off switch. The loader suspension provides for a smoother ride and improved operator comfort—no matter the load.

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW

Return-to-Position System

Experience superior productivity and repeatability during material handling operations with return-to-position. This industry-exclusive option allows you to return your loader to two stored boom and two stored bucket positions with a simple joystick activation. This eliminates the need to constantly check the loader height and attachment angle. That makes repetitive work much faster and easier.

NUMBER	DESCRIPTION	APPLICATION	LIST	NOW

John Deere oil filters + Plus-50™ II engine oil = 500 hours* free of downtime

When you pair John Deere oil filters with premium Plus-50 II engine oil, there's no stopping you for 500 hours! That's because John Deere engineers design our maintenance products to work hand-in-hand to defend your machine from harsh conditions and wear. Plus, both John Deere filters and Plus-50 II are ready to protect new Tier 4 engines.

Don't take your equipment to the field without this winning combo. Trust John Deere filters and oil to help your machines last.

*500-hour drain interval applies to diesel John Deere engines when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan, 2. Machine operates with Plus-50 II engine oil API CJ-4/SN, 3. Machine uses a John Deere oil filter, 4. Machine uses only Ultra Low Sulfur Diesel fuel.

John Deere Fuel Filters—They're just better.

When it comes to fuel, water is the number one enemy, leading to poor performance and reliability. That's why John Deere fuel filters are specially designed to not only trap water, but also repel it. Matched to your machine for optimized fuel flow, all genuine John Deere fuel filters are tested to meet or exceed original John Deere specifications.

Don't trust your equipment to anyone else. Insist on genuine John Deere fuel filters.

Scan here to see why John Deere filters are better!

Protect the engine in your All Makes equipment with the advanced technology of Fleetguard® filters.

We offer Fleetguard filters for almost every make of off-road equipment and heavy-duty on-road vehicle.

Lube: Fleetguard spin-on lube filters meet or exceed OE performance requirements and the new challenges of modern engine technology. StrataPore media as introduced in the full flow section to work in combination with the stacked discs to remove the smallest dirt particles, which cause the most engine damage. This configuration reduces engine wear by as much as 60% in some applications. The pairing of NanoNet® media with StrataPore® media has created a new breed of lube filter that offers higher efficiency, higher capacity, and the best cold flow vs. restriction available.

Air: Fleetguard air filters deliver the cleanest combustion air possible for On & Off Highway engine applications. Nanofiber, when combined with our enhanced pleat design, delivers optimal air filter performance for superior engine protection and lower equipment operating costs. Magnum RS® radial seal primary and safety air elements provide real-world value. Magnum RS offers unique features that provide significant benefits for longer service life and optimum performance when the job demands it.

Fuel: Fleetguard fuel filters deliver best-in-class performance using proprietary StrataPore or NanoNet media which remove harmful contaminants. Each gradient media layer offers unique properties that tailor performance based on specific applications requirements. Use of Fleetguard on-engine filters ensures optimal fuel system protection.

Hyd: We also offer a comprehensive replacement hydraulic filter line for many competitive filter part numbers. Through the right choice of filter media, Fleetguard hydraulic filtration products achieve higher efficiency and dust capacity with lower pressure-drop characteristics than the competition. This prolongs component life, which saves you money in the long run. The proper oil-cleanliness level for critical clearances on components in the hydraulic fluid stream is the key.

Plus-50™ II is your best choice for engine oil. We can prove it.

Since your John Deere equipment deserves top-quality protection, we've designed our Plus-50 II engine oil to protect our engines better than any oil out there.

Plus-50 II trumped competitors when tested in tough off-road conditions,* and it's the only oil we recommend to protect your John Deere equipment up to 500 hours under severe temperatures. And Plus-50 II is formulated specially to inhibit engine wear, no matter what brand of equipment or vehicle you're operating. You'll save on service costs and gain productivity.

*Rating applies when complete system flush is performed prior to use.

Plus-50™ II Synthetic SAE 0W-40 API CK-4/SN Engine Oil

Synthetic Plus-50 II Premium Engine Oil (SAE 0W-40) has been designed to provide advanced lubricant performance in modern engines to meet the requirements of EPA regulations. SAE 0W-40 Plus-50 II is a full synthetic PAO (Poly Alpha Olefin) based oil that provides excellent performance.

Excellent for all diesel engines requiring 0W-40 viscosity and API Service Classification CK-4, SN, and Mack EO-N Premium Plus 03. Superior performance for customers who operate in extremely cold or hot conditions and want to maximize engine life performance.

Plus-50™ II API CK-4/SN Engine Oil

The best John Deere oil, Plus-50 II SAE 15W-40 and 10W-30, is made with a unique additive system that offers excellent protection from deposits and wear. It exceeds API service classification CK-4/SN and John Deere specification JDQ-78X, and is available in quarts and 1-, 2 1/2-, 5-, 30-, 55-, and 275-gallon containers. It's excellent for all diesel engines!

- Superior product for current and older engines
- Formulated specifically to inhibit engine wear, corrosion, sludge, soot, varnish, and oxidation
- Extended drain intervals up to 500 hours in a John Deere engine, using a John Deere filter and ULSD diesel
- Proven performance in low-emission IT4 and FT4 engines
- Full-fleet solution and fully backwards compatible
- Tested and developed for severe off-road applications

Bulk Oil

Save time and money with John Deere bulk oil. If your fleet is using 330 gallons (1,250 liters) or more in a year, the John Deere bulk oil program can benefit your operations. Reduce your cost for oil, reduce the risk of contamination, and eliminate handling and disposal of packaged products with John Deere bulk premium lubricants. Visit your local John Deere dealer and ask to buy bulk John Deere Plus-50 II 15W-40 engine oil and/or Hy-GARD™ hydraulic/transmission oil.

Torq-Gard™

When you are looking for hardworking, standard-interval engine oil, Torq-Gard is a great choice. It protects in a broad range of applications, including 4-stroke diesel, natural gas, and gasoline engines. Available in 5W-30, 10W-30, and 15W-40.

- Neutralizes acid to reduce corrosion
- Provides sludge control for cleaner engines
- Many viscosity grades offered for application in moderate to very cold operating temperatures
- Low-temperature fluidity for reduced engine startup wear

Turf-Gard™

Turf-Gard motor oil is recommended for all 4-cycle gasoline engines in lawn and garden tractors, riding mowers, generators, and other outdoor power equipment. Turf-Gard keeps engines clean and provides superior engine wear protection and fuel efficiency.

NUMBER	DESCRIPTION	SIZE
TY25121	SAE 5W-30	1-qt.
TY22029	SAE 10W-30	1-qt.
TY25122	SAE 10W-40	1-qt.

See us for pricing.

Transmission and Hydraulic Oil

Hy-Gard™ oils are specifically developed to meet the exact requirements of transmissions, wet clutches, wet brakes, and hydraulic systems. Oils not meeting these exact specifications can compromise machine or component life.

Hy-Gard Oil

Available in 1-, 2 1/2-, 5-, 30-, 55-, and 220-U.S.-gallon containers.

- Recommended for equipment with common system reservoirs or separate transmission and hydraulic systems
- Exceeds JDM J20C specification

Low-Viscosity Hy-Gard Oil

Available in quarts and 1-, 5-, and 55-U.S.-gallon containers.

- Use in place of Hy-Gard oil in cold weather
- Exceeds JDM J20D specification

Bio Hy-Gard II Oil

Available in 5- and 55-U.S.-gallon containers.

- Made with farm-grown canola
- Biodegradable
- Use in place of mineral-based hydraulic oils

Antifreeze/Coolant

Cool-Gard™ II High Performance Long-life, Heavy-duty Formula

- Formulated for up to 6-years/6,000-hours* life in cooling systems of diesel and gas engines
- Supports advanced engine technology
- Protects against corrosion and deposits
- Extends water pump life and prevents liner cavitation
- High thermal and oxidation protection
- Ready-to-use 50/50 premix formula for freeze protection down to -34°F (-37°C)
- Contains bittering agent to help discourage accidental ingestion

Break-In Plus Engine Oil

Break-In Plus is a special purpose engine oil developed to be used in rebuilt or remanufactured engines and new John Deere engines during the initial break-in period/oil service interval. During the initial operation of a new or rebuilt engine with Break-In Plus, change the oil and filter between a minimum of 100 hours and a maximum of up to 500 hours. Check your operator manual for the maximum interval recommendation.

Break-In Plus provides two major differences from the traditional Break-In Oil:

- Meets the oil requirements for Final Tier 4 (FT4), interim Tier 4 (IT4), and supports all legacy engines
- Maximum drain interval up to 500 hours

Fuel-Protect Keep Clean / Microbiocide

Improve engine performance with John Deere Fuel-Protect Keep Clean for diesel injectors. Specifically formulated for modern high-pressure diesel fuel systems, John Deere Fuel-Protect Keep Clean limits and prevents the formation of deposits that cause injector sticking, engine misfire, rough idling, excess exhaust smoking, power loss, and/or hard starting conditions.

Keep it in the field longer. Trust John Deere batteries to get you through the season and beyond.

In the field, the right battery can make a big difference—and the right battery for your John Deere equipment is StrongBox™. It's the best battery you can use in your machinery because it's developed and tested right alongside John Deere equipment. Our engineers designed StrongBox with the following benefits to give you a better battery:

- Increased power for quick starts in extreme cold
- High cranking amps, faster charges, and efficient design for lowering electrical resistance
- Epoxy-anchored plates that are four times stronger than traditional plates to reduce vibration damage—the leading cause of failure in commercial batteries

StrongBox has also been proven to deliver better performance—up to eight times longer than its competitors. We even proved it with extensive testing against the top competitors in the industry.

Don't chance it with standard batteries. Power up with batteries built for the rugged conditions you face. Power up with StrongBox.

StrongBox™ Batteries

StrongBox batteries fit all makes of heavy- and light-duty equipment used on farms, ranches, and construction sites. They also fit most lawn and garden equipment, SUVs, and ATVs. You can't beat StrongBox for quality and value!

Spindles

Did you know that John Deere offers aftermarket alternatives for spindles for your Ariens/Gravely, AYP, Bobcat, Cub Cadet, Exmark, Grasshopper, Husqvarna, MTD, Toro, Troy Bilt, and many more mowers? Built for quality, these spindles use virgin aluminum for castings, are bead-blasted to remove any sharp mold flashing, and are machined and assembled with the tightest tolerance on pulley burnout. No matter where you bought your mower, we have the parts to keep it running strong.

Nothing Like Doing It Yourself

When your equipment is in top condition, putting it to use can be a pleasure. John Deere Home Maintenance Kits contain almost everything you need to tune up your machine in one convenient package. Available for most John Deere lawn tractors. Also compatible with other manufacturers' equipment with compatible engines. See your owner's manual for suggested routine maintenance.

Find your Home Maintenance Kit at JohnDeere.com/HMK and order online at JDParts.com

Tune Up and Head Out

No need to take your machine to the shop for a tune-up. Our Home Maintenance Kits make it easy to tune up your lawn tractor or Gator™ by providing almost everything you need in one convenient package:

- 2 quarts oil
- 1 oil filter
- 1 air filter
- 1 fuel filter
- Air precleaner
- Spark plugs

Check out some of our kits below. If you don't see your machine listed, don't worry. There are many other kits available. See us to get the appropriate kit for your machine.

MulchControl™

Improve performance, increase uptime, and reduce operating costs with our new, innovative MulchControl attachment. Compatible with High Capacity and Accel Deep™ mower decks for Signature Series tractors, EZtrak™, and Residential ZTrak™ mowers, this attachment does an excellent job of mulching and is easily converted to side discharge or bagging in just a few seconds with the use of a lever conveniently located on the mower deck.

The MulchControl attachment makes mulching a more desirable and practical option, so you can benefit from the advantages of mulching, including:

- A beautiful lawn
- Tidy grass clippings that aren't blown onto the operator, driveways, or flower beds
- Less fertilizer use
- No need to dispose of clippings

Take control of your clippings with MulchControl from John Deere.

NUMBER	DESCRIPTION	LIST	NOW
BM26300	Model Year 2015 and later X700 Series 54-in. HC Mower Deck (SN 30,001-), EZtrak Z625, Z655 (SN 170,001-), and Residential ZTrak Z535R and Z540R	\$241.81	\$217.60

Material Collection System

Provides an efficient means for picking up leaves and grass clippings. The dual-bag system is easy to empty because you unload one bag at a time. Excellent for difficult bagging conditions when grass is very heavy, long, or wet. Requires blower, discharge chute, and bagger assembly.

See us for MCS options for other riding lawn equipment models.

John Deere Fuel-Protect Gasoline Stabilizer

Blended fuel attracts water from the air, which causes corrosion to fuel tanks, fuel lines, carburetors, and injectors. John Deere Fuel-Protect contains double the corrosion preventer to help fight these damaging effects. Pumped gasoline starts to degrade immediately, causing varnish deposits to build in engines. This results in starting problems, poor performance, and reduced engine life. Add John Deere Fuel-Protect to keep fuel fresh for 12 months, more than doubling the storage life of fresh gasoline. John Deere Fuel-Protect also eliminates the need to drain fuel prior to storage.

NUMBER	DESCRIPTION	LIST
TY27534	Fuel-Protect for Gasoline, 8-oz.	\$ 4.49
TY27535	Fuel-Protect for Gasoline, 32-oz.	\$12.99

Tech Tip:

Every time you fill your red gas can, add some Fuel Protect gas stabilizer. Then you always have protected fuel and longer storage life.

Rear Hitch Kit

The rear hitch acts as a mounting point for rear and tow-behind attachments. Installs directly to the engine shroud of a Z900 with or without the cast-iron bumper installed. Z900 models all have a 400-lb. (181-kg) towing capacity.

Make your peace of mind last.

When you buy John Deere equipment, you get one of the best warranties in the business. With the PowerGard™ Protection Plan Residential, add up to four years of coverage beyond the normal warranty term on all utility vehicles, riding lawn equipment, zero-turn radius mowers, and compact and utility tractors. You'll get extended protection with ***\$0 deductible and no out-of-pocket costs on covered repairs***. Plus, transportation for factory warranty and extended protection repairs is covered!

If you decide to sell or trade your equipment before the end of the coverage term, the remaining coverage is fully transferable to the next owner. Lower cost, low-deductible Powertrain and Engine Protection Plans are also available.

Call or stop by today so we can customize your peace of mind plan.

*Heavy-Duty Mini Speakers (shown) sold separately.

Designed to be one of the most rugged stereos in the industry, this heavy-duty radio delivers high-quality audio while withstanding some of the harshest working conditions.

A AM/FM/WB/iPod®/iPhone®/ SiriusXM™ Heavy-Duty Radio

SWJHD1630
\$243.61 **\$219.20**

Boldly go where no radio has gone before.

The weatherproof Jensen SWJHD906BT radio brings news, weather, and Bluetooth™ capabilities to Gators, Skid Steers, and Open-Station Tractors. You get NOAA Weatherband with weather alert, AM/FM radio, Bluetooth playback, controls, and the ability for hands-free calling (external microphone SWJMICHFP sold separately), and an input to play iPod, MP3 player, or portable CD player.

B Mini 906BT Radio

SWJHD906BT
*Heavy-Duty Mini Speakers (SWJXHD35) sold separately.
\$304.75 **\$274.30**

The SWJHD1365BT stereo is built tough for demanding environments while featuring the latest technological advancements. This radio features Bluetooth streaming audio (microphone included) with hands-free calling, giving you a truly hands-free experience. The iPod/iPhone capabilities can be taken advantage of via the USB so you can take your personal music library with you. Plus, the stereo is also SiriusXM-ready, offering you endless entertainment options.

C AM/FM/WB/iPod- & iPhone-ready/SiriusXM/ Bluetooth Stereo

SWJHD1635BT
\$289.99 **\$261.00**

We made the cab quiet. Now give your ears something to listen to.

If your cab radio is dead, dying, or just plain dysfunctional, consider an audio upgrade. Tune in to local news, weather, and sports, or bring your own audio stimulation via CD or MP3. Satellite news and music are also an option.

Pull in AM/FM and weather-band signals. This new heavy-duty radio has a full 7-channel NOAA Weatherband tuner and tells the time with the new segmented high-visibility display. It also comes with front Aux in capabilities and is equipped with a two-wire hookup that prevents battery drain when the vehicle is off.

D AM/FM/WB Heavy-Duty Radio

SWJHD1130
\$160.36 **\$144.30**

In today's modern heavy-duty market, having a radio built to survive the tough stuff doesn't mean that it has to sacrifice in-demand entertainment options. The SWJHD36MIC features the ability to receive Bluetooth streaming audio and phone calls from a Bluetooth-enabled mobile phone, giving you a truly hands-free experience. The microphone required for hands-free calling comes standard with the radio. This state-of-the-art heavy-duty stereo also has NOAA 7-channel Weatherband tuner with S.A.M.E technology to focus on a more specific region, giving you more accurate weather updates along with being iPod- and SiriusXM radio-ready.

E AM/FM/WB/CD/USB/Bluetooth®/iPhone/ iPod/SiriusXM Stereo

SWJHD36AMIC
\$325.65 **\$293.10**

John Deere—your hardware headquarters.

See your John Deere dealer for two easy, cost-saving ways to stock up on hardware for your farm and shop:

1) Grab what you need and pay by the pound.

- Bolts
- Fender washers
- Wing nuts
- Plow bolts
- Flat washers
- Nylon nuts
- Carriage bolts
- Lag screws
- And more!
- Lock washers
- Hex nuts

2) Customize your own hardware needs.

Make us your one-stop shop. See us today for great savings and added accessibility.

ToughCam Digital Wireless Observation System

It's not X-ray vision—but it's the next best thing.

This one-camera digital observation system far exceeds the performance of any other analog system on the market. It features a WiSight signal so strong that it easily transmits through and around objects up to 60 feet away—with no interference.

Other benefits:

- Delivers a sharp, vivid picture with the 5.6-in. color LCD monitor
- Suction cup mount and 12-volt DC power plug for the monitor make this system easily portable among vehicles
- Wireless for easy and convenient setup

Applications:

- Tractors and round balers
- Sprayers
- Trucks and trailers
- Recreational vehicles
- Industrial
- Marine

Loctite® Naval Jelly® Rust Dissolver

Loctite Naval Jelly Rust Dissolver is the original rust treatment formula that has been used for over 40 years. It removes rust from metal surfaces such as iron and steel and can be sprayed or brushed on metal surfaces

Features and benefits:

- Ideal for heavily rusted items
- Works in 5–10 minutes
- Removing rust from metal surfaces made of iron or steel
- Use on loader buckets, hitch balls, wagons, trailers, iron railings, barbecue grills, pipes, valves, storage tanks, automobiles, tools, lawn mowers, and more
- Water-soluble for easy cleanup
- Can be sprayed or brushed on

Not recommended for: Plastic, Aluminum, Chrome, Fiberglass, Cement, or Marble

NUMBER	DESCRIPTION	LIST	NOW

Multi-Purpose Spray Lubricant

Use this superior lubricant in hundreds of applications. It's a water-displacing, friction-reducing, light-penetrating oil. It prevents rust and also works well to free up parts already seized by rust, scale, or corrosion. Will not harm electrical contacts, wood, vinyl, or paint.

NUMBER	DESCRIPTION	LIST	NOW
TY6350	Multi-Purpose Spray Lubricant, aerosol	\$6.99	\$6.30

Penetrating Oil

An industrial strength, free-flow penetrant designed to quickly penetrate and loosen the toughest and most stubborn nuts, bolts, and parts. Preferred by mechanics and sure to work as hard as you do!

NUMBER	DESCRIPTION	LIST	NOW
TY26353	Penetrating Oil	\$4.49	\$4.00

Paint Remover

Our paint remover is perfect for removing acrylic, enamel, and latex paint from all metal and wood. All you have to do is spray it on to your surface, let it sit for 10 minutes, and then scrape off the loose paint. It's that easy.

For multiple paint layers, reapplication might be required. Benefits of our paint remover include:

- Methylene chloride-free
- A powerful combination of solvents for faster paint removal
- High viscosity to help coat vertical surfaces

NUMBER	DESCRIPTION	LIST	NOW
TY27304	Paint Remover, 12 oz.	\$8.60	\$7.70

Paint

We offer high-quality, long-lasting, colorfast paints that deliver all-weather performance for John Deere and all-makes equipment applications.

Lead-Free Enamel Paint

John Deere lead-free enamel paint is environmentally safe for both interior and exterior applications. Sets up in minutes and is tack-free in a few hours. Dries overnight to a hard, glossy finish that resists fading, cracking, and chipping.

Low-VOC Paint

John Deere offers a solvent-based paint to meet stringent volatile organic compound (VOC) state and federal regulations. Easily replaces the waterborne formula in similar applications.

- Provides a low viscosity of 2.8 VOC for easier spraying
- Requires only a moderate air-dry time
- Free of hazardous air pollutants

Fast-Dry Paint

Dries to the touch in one hour and requires minimal thinning for spray applications. Developed in a lead- and chrome-free formulation to protect against chipping, corrosion, and rust.

*See your dealer for additional sizes, colors, and paint accessories.
