## JOHN DEERE SPRAYER UPGRADE KITS

### ExactApply:

- Premium Individual Nozzle Control: six nozzle turret with multiple modes of operation maintains rate and pressure to reduce overapplication, crop burn and off-target drift.
- Cover up to 20 more acres per hour
- Save 2-5% on herbicides and pesticides.

— ADD —

### See & Spray:

- See, target, and kill in-season weeds using advanced cameras and machine learning
- Select targeted or broadcast applications
- Save on non-residual herbicide use

### ADDITIONAL OPTIONS:

#### *Pressure Recirculation and Product Reclaim*

- Pressure recirculation pushes product through the sprayer booms with a three-way valve, keeping solution from settling and delivering a consistent product to every nozzle.
- Product reclaim pushes air through the sprayer lines and moves the solution back into the center feed tank.

#### *BoomTrac Pro 2*

- Offers a 22% greater spray accuracy and five-time increase in the amount of time the boom maintains its target height.
- Helps ensure accuracy in product application and reduces drift, even in hilly or rough conditions.
