PLATE COMPACTORS

PC4 | PC7 | PC10

Specifications

- Designed specifically for trench-, slope-, and excavation-compaction applications.
- Eccentric housing design encloses and protects the motor.
- Large eccentric weight offset from motor shaft helps provide high-impulse force, resulting in improved compaction rates.
- Hydraulic motor bearings use oil-splash lubrication, and sealed eccentric bearings provide maintenance-free operation.
- Like all Worksite Pro attachments, these plate compactors are optimized to work with John Deere compact excavators and backhoe loaders. They're also compatible with most competitive models. See your local Deere dealer for details.
